      Multiscale
      Accessibility
      Location & Size
      Green Density

- QUALITY OF LIFE
- LOCALITY
- NEIGHBORHOOD UNITS
- SELF-SUFFICIENT

Correlation of Well-Being and Cittaslow

The main purpose of the movement:
"while emphasizing the importance of place-based quality of life
1. To increase the quality and attractiveness of life by using technology,
2. To realize sustainable development with values specific to the region,
3. To provide justice between income and payments by contributing to the local economic life,
4. To protect natural, cultural, and historical values."

REGENERATION
An economic and social change in addition to physical

In the context of planning;
- Path dependent
- Context specific

CITTA SLOW CRITERIA

According to the International Cittaslow Regulation Annex C (12 May 2017), the Cittaslow criteria are;
